See attached the list of applications still pending from Auction 83 selected by Edgewater Broadcasting for further processing, as well as the required Preclusion Studies and No Overlap Showings for all sites selected outside Appendix A markets and for all sites in markets where more than one application was selected.

No explicit grid studies are provided since all markets where multiple applications were selected are “Spectrum Available” markets, in which, according to the guidelines in the Fourth Report and Order, a short form application cannot by definition fail the grid test.
