Hello Hossein,

We have 3 LPTV stations in NE Kansas. Ch 26 in Topeka is operating as the main station, with Ch 22 to the West and Ch 25 to the East, both re-transmitting the Ch 26 signal.

We would like the Channel Number that Viewers See to all show up as "Channel 25.x" (virtual channel).

There are no conflicting RF or Virtual Channel 25's close to our area, just our own Ch 25 on our East Transmitter.

Is this ok to do?

The information on our stations is below.

Thanks so much,

Robert Nall
