**Re: WWWK, Islamorada, FL (FID 34355)
Request for Extension of Existing Engineering STA,
FCC File No. BSTA-20180223AAI**

Dear Audio Division:

On behalf of Universal Broadcasting Network LLC (“Licensee”), FRN 0021029368, we hereby submit the following Request for Extension of Existing Engineering STA for WWWK(FM), Islamorada, Florida, FID 34355.

Licensee hereby requests an extension of the current Special Temporary Authority which expires on February 19, 2022. The WWWK(FM) main facility was rendered inoperable from issues related to Hurricane Irma in the Fall of 2017. Licensee has a construction permit which was granted on December 18, 2019 to relocate to a permanent facility, FCC File No. BPH-20190924ACX. The WWWK transmit antenna will be located at a tower associated with ASR No. 1308371 at Tavernier, Florida.

Since the last STA request, Licensee has worked diligently to procure equipment and prepare the tower site as the Covid-19 pandemic slowed down. Although still not back to normal, Licensee has been able to begin engaging with engineers about making the necessary repairs. All equipment and antenna have been purchased. The landlord decided not to proceed with the original tower that Licensee had been approved for. This was a set back, but Licensee has found another tower and is currently waiting on the response. Licensee is very limited as far as towers go in the area and respectfully requests an extension of the current Special Temporary Authority while it continues reconstruction of its facility.
