

8.	Please explain in detail the "extraordinary circumstances" which warrant temporary operations at variance from the Commission's Rules. In addition, please specify 1) the specific rules and/or policies from which the applicant seeks temporary relief; 2) how the public interest will be furthered by grant; and 3) the expected duration of the STA and the licensee's plan for restoration of licensed operation. If requesting variance with other than authorized technical facilities, please specify the exact facilities sought.	[Exhibit 34]
9.	Anti-Drug Abuse Act Certification. Applicant certifies that neither applicant nor any party to the application is subject to denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. Section 862.	<input checked="" type="radio"/> Yes <input type="radio"/> No

I hereby certify that the statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith. I acknowledge that all certifications and attached Exhibits are considered material representations.

Description:

Basis for STA Extension

As detailed below and in KNYN's initial request for STA, the tower from which the station was operating collapsed, damaging the station's equipment and preventing it from operating with its full authorized facilities. The site at which the station is authorized had gone through two owners since the collapse of the tower, and neither was able to restore the facility. Thus, KNYN has been unable to restore operation with its full licensed facilities.

On November 14, 2005, the broadcast tower from which KNYN operated, located on top of a mountain, collapsed during a severe storm. Following the loss of its tower, KNYN was able to restore limited service at reduced power using back-up equipment. Since that time, the station has been operating from the site using a vertical-only antenna mounted on a mast approximately 15-feet tall. Although the station is broadcasting with only 625 watts of power, it has been able to maintain limited service to its listeners. Given the significantly lower ERP and antenna height, the contours of this temporary facility do not extend beyond KNYN's authorized contour defined by its license.

The original owner of the site was not able to construct an adequate replacement tower after the collapse of the original tower. He had erected a replacement tower, but the replacement tower also collapsed the next time there was severe weather at the site. Given the low rent potential, the past owners of the site had been unwilling to rebuild a new tower that would withstand the weather, and because of the remote location of the station, the licensee of KNYN has not been able to secure alternative sites. This is the best site in the area, and Licensee has been working to secure a replacement tower there. Licensee recently purchased the site and plans to make much-needed upgrades. Licensee is currently assessing the situation and working on a construction plan for this station. This includes discussions with a tower company about constructing a new tower at the site, but winter weather prevents site visits and further work until the spring.

Given the above, as the licensee now owns the site and is actively pursuing the necessary changes, Licensee hereby requests an extension of the STA to allow it to continue broadcasting with reduced power. Grant of this STA request is in the public interest as it will permit the station to maintain its service to the public.
