Re: Iglesia Nueva Vida of High Point, Inc. (INV)
WRJR(AM), Claremont, VA
Facility Identification Number: 68741
Special Temporary Authority (STA)
BESTA-20220208AAG

Dear Ms. Tapia:

This is in reference to the request filed on February 8, 2022. INV requests a further extension of the STA granted on June 14, 2019, to continue operating ND with reduced power to allow time to repair/replace the 20 kW daytime transmitter and then file the required FCC Form 302 application to update all operating parameters due to repairs made over the past two years.¹ In support of the request, INV stated that it was unable to repair the 20 kW transmitter over the past six months.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA is **HEREBY GRANTED**, and INV may continue to operate with DA parameters at variance using a reduced power of 12 kW daytime, and the licensed power of 0.003 kW at night, while maintaining all monitor points within licensed limits. INV must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR §1.1310. INV must submit an e-mail to my attention to note the date the application was filed, or to note the date the station was able to resume licensed operations per BL-20040526ATG with negligible changes.

This authority expires on **August 17, 2022**.

¹ WRJR(AM) is licensed for DA operation on 670 kHz with 20 kW (day) and 0.003 kW (night), using the same pattern.

Sincerely,
