February 28, 2022

Media Bureau:

I am writing to request the extension of the STA for K257GW, facility ID 154135, community of license Nebraska City, NE.

The translator went silent on 08/31/2021. File number for that request is BLSTA-20210909AAQ.

The reason for the request to extend the STA is that we encountered a very unexpected situation with the tower lease. We had reached an agreement with the company that owns the tower and then they discovered that the city where the tower is located hadn't given them authority to lease any land space. So they had to negotiate with the city for rights to lease land for our transmitter equipment, which led to the city asking for revenue sharing. The tower company and the city have finally reached an agreement, and we should be clear to proceed with construction very soon.

Attached is the Anti-Drug Abuse Act Certification.

Please let me know if any other information is needed.

Thanks for all you do!
