WILLFUL FALSE STATEMENTS ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE, TITLE 18, SECTION 1001), AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION PERMIT (U.S. CODE, TITLE 47, SECTION 312(a)(1)), AND/OR FORFEITURE (U.S. CODE, TITLE 47, SECTION 503). SEE THE ATTACHED STATEMENT OF THE STATION'S CONSULTING ENGINEER REFLECTING ENVIRONMENTAL COMPLIANCE FOR THE PROPOSED STA OPERATION.

## Attachment 33

 Description

 See attached statement on next page.

## Exhibit 34

Description: EXTRAORDINARY CIRCUMSTANCES WARRANTING THE REQUESTED STA OPERATION

The Commission has been advised for some time that the station has been operating with reduced power and with its directional parameters at variance to stay within licensed monitor point limits. In addition, the Commission has been told that the licensee has had to make extensive repairs to the station to stay on the air, and once those repairs were complete, that the station resumed operation with its nighttime pattern at reduced power. As the Commission is also aware, the license has had to use tower crew time to replace damaged sample loops. The licensee had also had to use tower crew time and budget to paint towers and make tower lighting repairs to remain in compliance. Half of those repairs and painting are complete. Extensive fencing repairs also had to be performed due to extreme windstorms, but those repairs are now complete. In the spring, the licensee is anticipating that the tower personnel will complete the paining, tower light repairs and replace the damaged sample loops which are necessary for the station to resume testing and pull the phasor equipment into original parameters before a proof is performed. Although the Commission is aware that the station's most recent STA extension expired last month, because of record-keeping relocation issues this request for an extension was inadvertently not submitted until this time. However, in order for the licensee to continue to operate the station with its nighttime pattern during the day and night at reduced power, but within licensed limits, it is hereby requested that the Commission grant the station special temporary authority for its operation pursuant to the authority granted under file number BESTA-20210712AAI, subject to the terms and conditions specified in its original STA.

## Exhibit 33

## Statement of continued compliance

The proposed STA will not have an environmental impact or alter the continued compliance of WPLM FM to limiting radiofrequency exposure to the general public and site workers.

The scheduled tower equipment repairs will take place with WPLM-AM off the air in order to protect workers during those operations.

All 4 towers have had fencing repaired and are in good condition and appropriate RF exposure warning signs are in place. The tower site and transmission site is secure. Tower lighting is maintained and operational in compliance with FCC and FAA regulations.
