Re: IHM Licenses, LLC (IHM)

WNTM(AM), Mobile, AL Fac. ID No.: 8695

Special Temporary Authority (STA)

BESTA-20220303AAG

Dear Mr. Langham:

This is in reference to the request filed on March 3, 2022. IHM requests a further extension of the STA granted on March 5, 2021, to continue ND operation using the daytime tower at night with reduced power to allow time to complete all remaining repairs to the antenna control system¹ In support of the request, IHM stated that substantial work has been completed, and additional time is needed.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA is GRANTED, and IHM may continue to operate ND at night using tower #2 of the nighttime directional array with a maximum of 0.25 kW, with no change to the licensed daytime operation. IHM must reduce the nighttime power further or cease nighttime operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR 1.1310. IHM must submit an e-mail to my attention to note the date an FCC Form 302 application was filed to update all operating parameters, or to note the date the station was able to resume licensed operations per BMML-20111018ATB with

 $^{\rm 1}$ WNTM(AM) is licensed for operation on 710 kHz with 1 kW (ND daytime and DA nighttime).

negligible changes.

This authority expires on **September 17, 2022.**

Sincerely,

Joseph Szczesny, Engineer
