Re: CMG Coastal Carolina, LLC (CMG)  
WNCT(AM), Greenville, NC  
Fac. ID No.: 57841  
Special Temporary Authority (STA)  
BESTA-20220516AAA

Dear Mr. Curtis:

This is in reference to the request filed on May 16, 2022. CMG requests a final extension of the STA granted on March 16, 2021, to continue operating with reduced power to allow time to file the required FCC Form 302 application.<sup>1</sup> In support of the request, CMG stated that it now plans to detune four of the five existing towers and then submit the application next month to cover BP-20210204AAJ.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and CMG may continue to operate with the day and night directional antenna patterns using a reduced power of 5 kW. CMG must use whatever means are necessary to protect workers and the public

---

<sup>1</sup> WNCT(AM) is licensed for DA operation on 1070 kHz with 50 kW day and 10 kW night using different patterns, and BP-20210204AAJ authorizes ND operation using 5 kW day and 0.013 kW at night using tower #2.

from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. CMG must submit an e-mail to my attention to verify the date the application was filed.

This authority expires on **November 16, 2022**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joe Szczesny". The signature is fluid and cursive, with the first name "Joe" written in a smaller, more compact script than the last name "Szczesny".
