ENGINEERING STATEMENT OF CYNTHIA M. JACOBSON, P.E.
IN SUPPORT OF A
REQUEST FOR SPECIAL TEMPORARY AUTHORITY
WCCD – PARMA, OHIO
1000 kHz – 0.5 kW DAY – DA-D
Facility ID: 25522

Applicant: New Spirit Revival Center Ministries, Inc.

I am a Consulting Engineer, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission. I am a Registered Professional Engineer in the Commonwealth of Virginia, Registration No. 0402027914.

GENERAL

This office has been authorized by New Spirit Revival Center Ministries, Inc. ("New Spirit"), licensee of Standard Broadcast Station WCCD, Parma, Ohio, to prepare this Engineering Statement in support of a Request for Special Temporary Authority to operate at variance from licensed parameters.

WCCD is licensed to operate on 1000 kHz with a daytime power of 0.5 kW using a four tower directional array (DA-D).

WCCD was recently informed that the towers will be dismantled and the land is being redeveloped by a new owner. The new owner has agreed to permit WCCD to temporarily operate from the #1 (north) tower until construction progress requires that the

tower be removed. An Application for Construction Permit for a permanent site is being prepared at this time and is expected to be filed shortly.

It is requested that Special Temporary Authority be granted to permit WCCD to operate nondirectionally from their licensed site with no more than 25% of its authorized daytime power. The tower as identified by ASR #1058023, will be used as the nondirectional tower for the STA operation.

SUMMARY

This statement was prepared by me or under my direct supervision and are believed to be true and correct.
