Re: Estuardo Valdemar Rodriguez (EVR)
WLLN (AM), Lillington, NC
Facility Identification Number: 26151
Special Temporary Authority (STA)
BESTA-20220712AAA

Dear Mr. Rodriguez:

This is in reference to the request filed on July 12, 2022. EVR requests an extension of the STA granted on January 14, 2022, to continue operating with a reduced daytime power of 0.05 kW due to a damaged transmitter and air conditioning system.¹ In support of the request, we noted that EVR will require additional time to install a new 5 kW daytime transmitter (if unable to repair the old transmitter in the upcoming months) and repair the transmitter building air conditioning system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

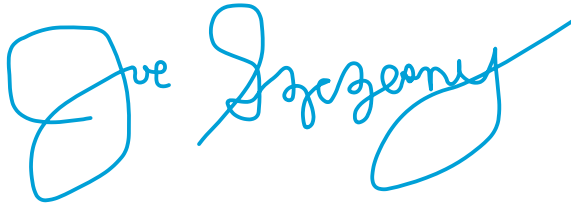

Accordingly, the request for extension of STA is **HEREBY GRANTED**, and EVR may continue to operate daytime with DA parameters at variance and a reduced power of 0.05 kW while maintaining all monitor points within licensed tolerances (with no change to the licensed 0.049 kW nighttime operation). EVR must use whatever means are necessary to protect workers

¹ WLLN is licensed for DA operation on 1370 kHz with 5 kW daytime pattern, using the same pattern at night with a reduced power of 0.049 kW.

and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR §1.1310. EVR must submit an e-mail to my attention to note the date the station resumed licensed operations per BL-19841001AR with negligible changes, or to note the date an FCC Form 301 application was filed to permanently reduce power using a lower powered transmitter or make other changes to the licensed antenna system.

This authority expires on **January 14, 2023**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joe Szczesny", with a large, stylized initial "J" and a long horizontal stroke extending to the right.

Joseph Szczesny, Engineer
