Re: Audacy License, LLC  
WEEI(AM), Boston, MA  
Fac. ID No.: 1912  
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed August 3, 2022, on behalf of Audacy License, LLC ("Audacy"). Audacy requests special temporary authority ("STA") to operate station WEEI(AM) with parameters at variance from license values and/or reduced power.<sup>1</sup>

In support of the request, Audacy states that station personnel for AM station WEEI(AM) recently noticed a change in licensed parameters going out of tolerance. The change coincided with work being performed by a tenant on an adjacent cellular tower. It is expected that work on that adjacent tower will continue for some time. Therefore, final detuning of the tower will not be completed until all of the work is finished. Thus, WEEI(AM) requests STA to operate with parameters at various from license values until all the work on the adjacent tower has been completed.

Accordingly, the request for STA IS HEREBY GRANTED. Station WEEI(AM) may operate with parameters at variance from license values and/or reduced power. It will be necessary to further reduce power or cease operation if complaints of interference are received. Audacy must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 1, 2023**.

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of

---

<sup>1</sup> WEEI(AM) is licensed for operation on 850 kHz with a daytime and nighttime power of 50 kilowatts, employing different directional antenna patterns (DA2-U).

an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

A handwritten signature in black ink that reads "Jerome J. Manarchuck". The signature is written in a cursive style with a large, stylized initial "J" and a long, sweeping tail.
