Re: Gold Coast Broadcasting LLC (GCB)
KVTA(AM), Ventura, CA
Facility Identification Number: 7746
Special Temporary Authority (STA)
BESTA-20220801AAD

Dear Mr. Hearne:

This is in reference to the request filed on August 1, 2022. GCB requests a further extension of the STA granted on June 5, 2019, to continue operating with parameters at variance to allow time to file the required FCC Form 302 application.¹ In support of the request, GCB stated that additional time will be needed for Hatfield and Dawson to assist them in preparing and file the application to update all operating parameters containing a method of moment proof showing.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and GCB may continue to operate with DA parameters at variance (and reduced power if needed) to maintain all monitor points within licensed limits. GCB must reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

¹ KVTA(AM) is currently licensed for DA operation on 1590 kHz with 5 kW (day and night), using different patterns.

This authority expires on **February 14, 2023.**

Sincerely,

A handwritten signature in blue ink, appearing to read "Joe Szczesny". The signature is fluid and cursive, with a large loop at the beginning and a long, sweeping tail.
