Veronica Tapia, President Iglesia Nueva Vida of High Point, Inc. 1841 Bethel Drive High Point, NC 27260

Re: Iglesia Nueva Vida of High Point, Inc. (INV)

WRJR(AM), Claremont, VA

Facility Identification Number: 68741 Special Temporary Authority (STA)

BESTA-20220816AAB

Dear Ms. Tapia:

This is in reference to the request filed on August 16, 2022. INV requests a further extension of the STA granted on June 14, 2019, to continue operating ND with reduced power to allow time to file the required FCC Form 302 application to update all operating parameters (due to extensive fire damage repairs made over the past three years). In support of the request, INV stated that the antenna system has been restored with the exception of the 20 kW transmitter, and it is now in the process of assigning the station's license to Stu-Comm, Inc.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond
 the licensee's control, and the licensee has taken all possible steps to expeditiously resolve
 the problem.

Accordingly, the request for extension of the STA is HEREBY GRANTED, and INV may continue to operate with DA parameters at variance using a reduced power of 12 kW daytime, and the licensed power of 0.003 kW at night, while maintaining all monitor points within licensed limits. INV must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR §1.1310. Stu-Comm, Inc. must submit an e-mail to my attention to note the date the FCC Form 302 application

-

¹ WRJR(AM) is licensed for DA operation on 670 kHz with 20 kW (day) and 0.003 kW (night), using the same pattern.

was filed after the 20 kW transmitter has been replaced (since INV was unable to repair it over the past three years).

This authority expires on February 25, 2023.

Sincerely,

Joseph Szczesny, Engineer
