Regarding WAKE AM facility number 53057.

WAKE recently returned to the air using its original licensed facilities.

Since returning to the air at normal power of 1 Kilowatt (day) the station has experienced trouble with its main transmitter, a BE AM1A.

Repairs or replacement may take some time due to supply chain issues and the age of this model.

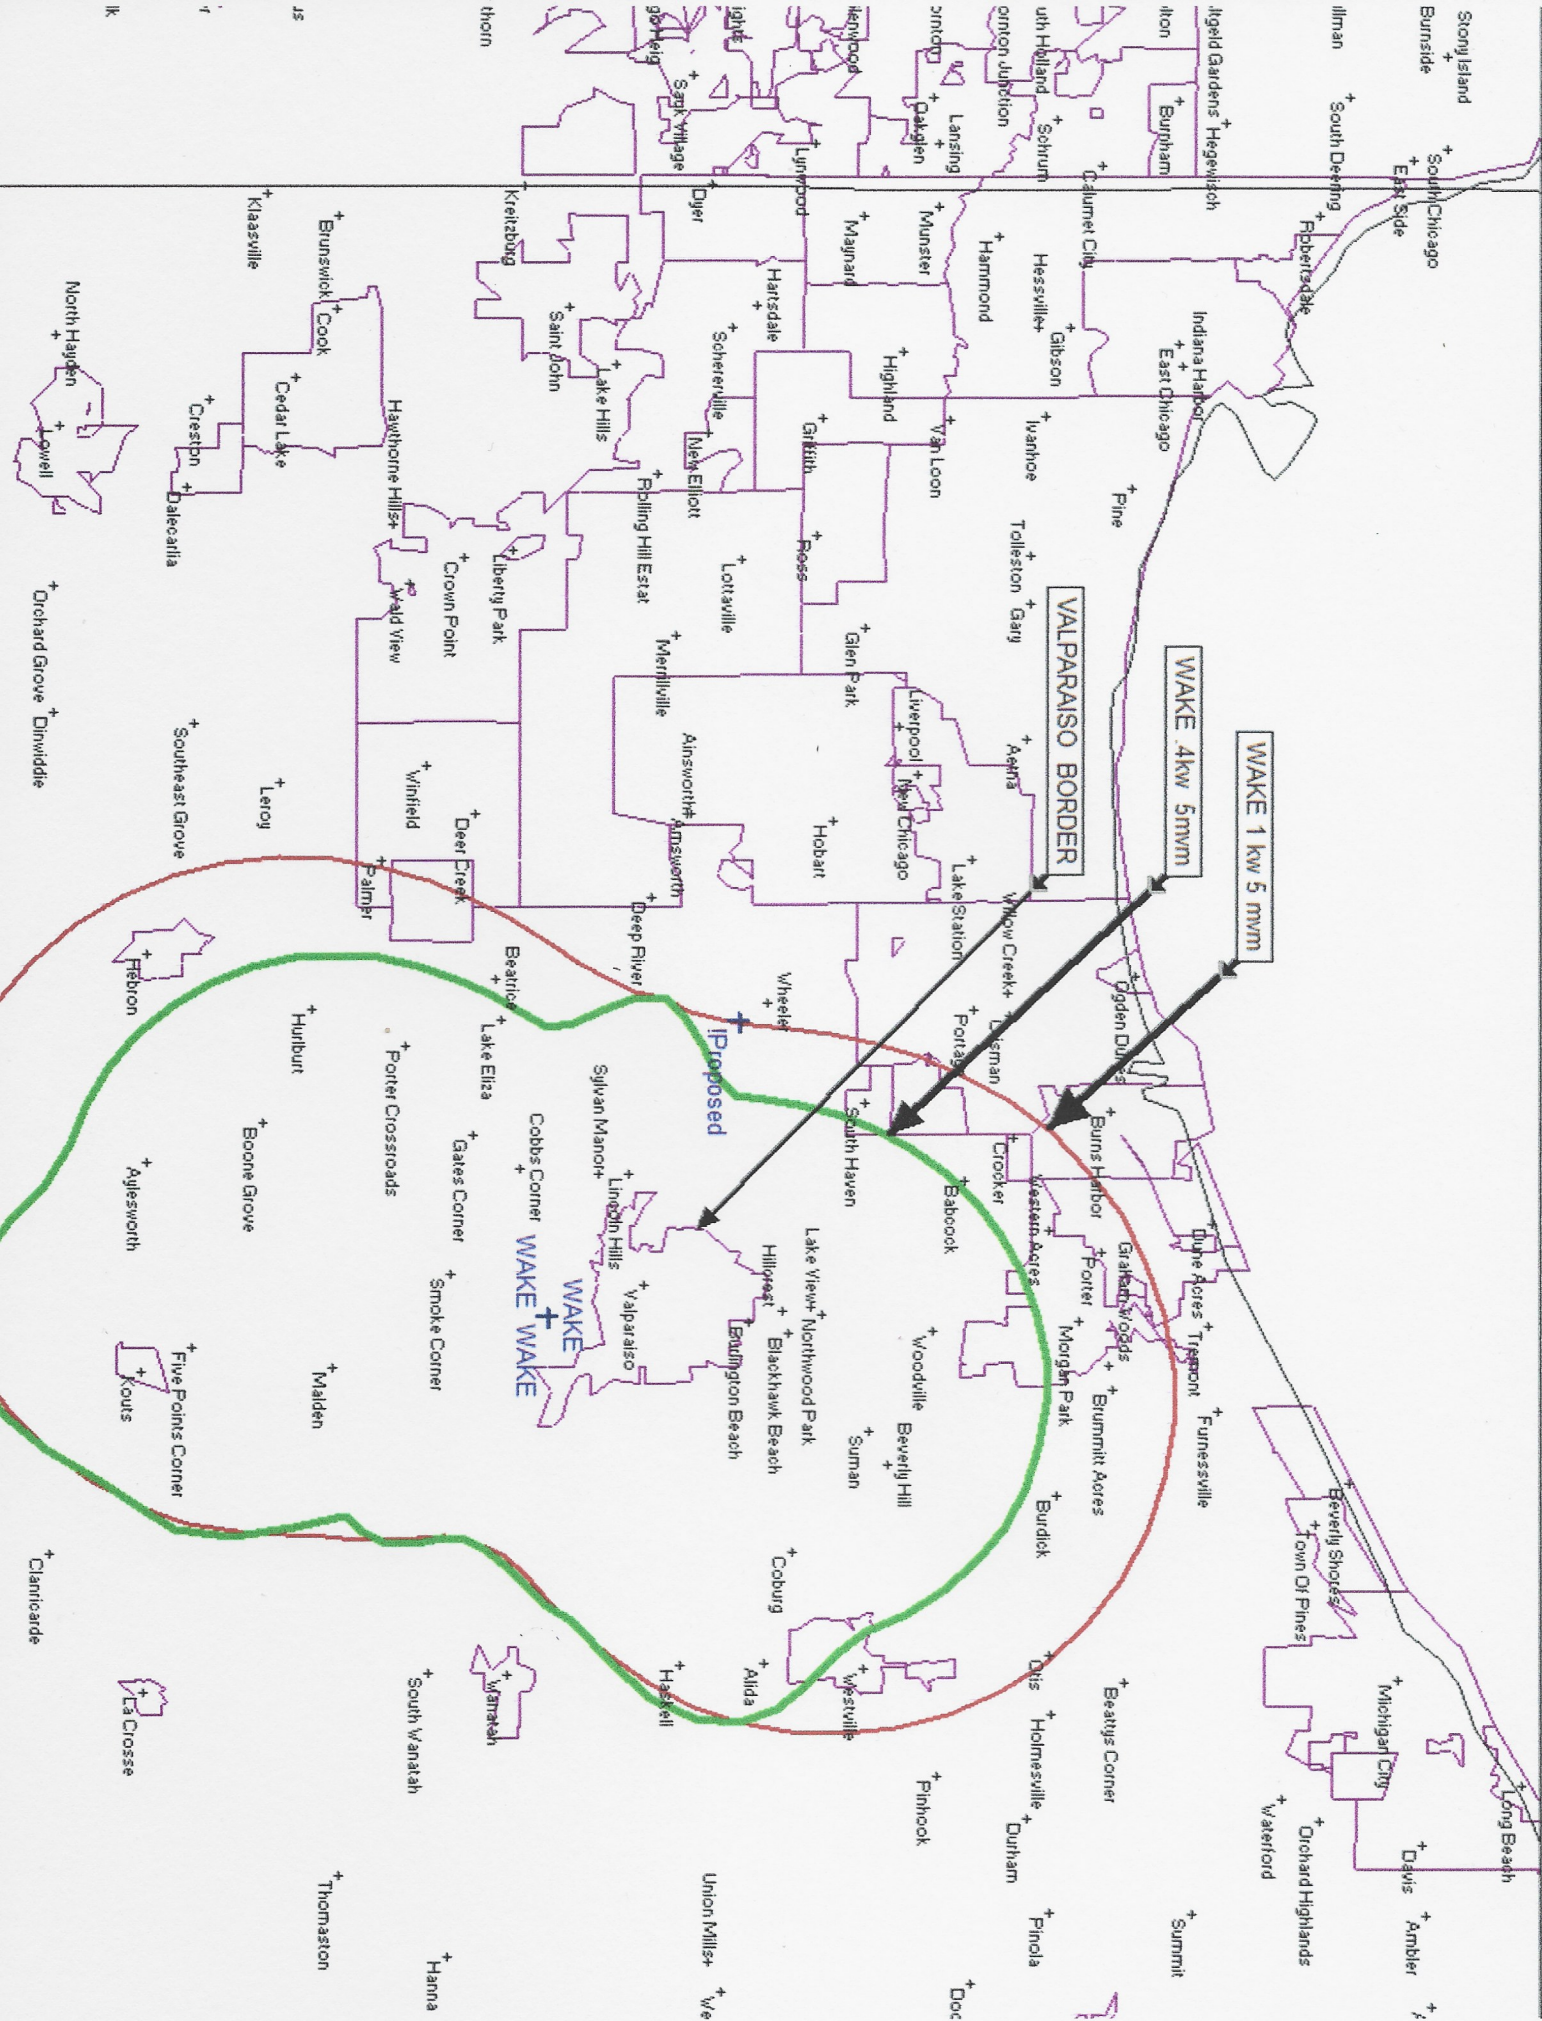

WAKE is able to remain on the air with a power output of 400 watts until the AM1A is repaired. To that end, WAKE requests an STA for technical reasons to allow operation At 400 watts Day operation. The attached exhibit will show at 400 watts the city of license is still well covered by the 5mV/m contour.

Respectfully

  
Larry Langford

Chief Engineer WAKE
