## **Exhibit E-1**

### **Tower-Mounted Antenna**

Question 9 of Section III of the accompanying FCC Form 302-AM asks for details, dimensions and other pertinent information regarding other antennas mounted on the tower and their associated isolation circuits. There is a Ubiquiti PowerBeam M400 5.7 GHz antenna mounted at the 150-foot level of the tower. This antenna and its integral electronics are connected with a length of CAT6 network cable, which is isolated with a Kintronic Laboratories CHOKE-CAT6-2 isolation choke, which has a manufacturer's specified inductance of 468 uH, which corresponds to an inductive reactance in excess of 3,500 ohms.

The isolation choke was installed in accordance with the manufacturer's instructions, bonded to ground on the low side and bonded to the tower on the high side. Self-impedance measurements were made after installation and the results were as expected.
