Special Temporary Authority (STA)
BESTA-20220427AAF

Dear Mr. Mazursky:

This is in reference to the request filed on April 27, 2022. MRP requests a further extension of the STA granted on August 27, 2019, to continue ND operation with reduced power to allow time to install a new replacement tower #1 and complete all other required repairs/equipment replacement.¹ In support of the request, MRP stated that it plans to install the new tower after it has been delivered in order to then file the required FCC Form 302 application to update all operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

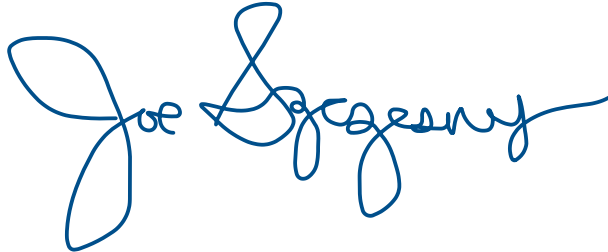

Accordingly, the request for extension of the STA is **HEREBY GRANTED**, and MRP may continue to operate ND with a maximum of 1.57 kW (day) and 0.375 kW (night). MRP must reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR §1.1310.

¹ WTOX(AM) is licensed for DA operation on 1480 kHz with 6.3 kW (day) and 1.5 kW (night), using the daytime pattern at night with reduced power.

MRP must submit a brief e-mail to my attention to note the date the application was filed with the AudioFilings team (as required due to replacement of tower #1).

This authority expires on **April 26, 2023**.

Sincerely,
