Description: Request for Engineering STA

Anti-Drug Abuse Act Certification. Applicant certifies that neither applicant nor any party to the application is subject to denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. Section 862.

On 19 October 2022 it was discovered that the directional array of WGMM was out of tolerance. The problem was traced to several bad capacitors in the antenna tuning units. Replacement capacitors are back ordered with lead times of six months being quoted from different manufacturers.

Therefore WGMM decided to operate the station in non-directional mode with the following parameters:

Day 1250 Watts Transmitter Power Output
Night 40 Watts Transmitter Power Output.

These power levels reduce the field measured at the monitor points to the maximum allowed during directional operation.

Therefore WGMM requests operation with these parameters until April 19, 2022.

I hereby certify that the statements in this application are true, complete and correct to the best of my knowledge and belief and are made in good faith. I acknowledge that all certifications and attached Exhibits are considered material representations.
