Fac. ID No.: 28663  
License application: BL-20221011AAC  
Construction Permit: BP-20210430AAC  
Program Test Authority (PTA)

Dear Ms. McCoy:

This letter is in reference to the above captioned license application and request for PTA filed on October 11, 2022, to cover the Construction Permit (BP-20210430AAC) for station KEZY(AM) to reduce power and co-locate with KTIE(AM).

We noted that HFB submitted a showing to verify condition #5 on the permit has been met by submitting a diplexing agreement, an acceptable spurious emissions showing, and by noting that the required KTIE 302 application had been filed with a new method of moment proof. Accordingly, authority is granted KEZY(AM) to commence limited program tests in accordance with Section 73.1620 of the Commission's Rules, and Construction Permit BP-20210430AAC to operate on 1240 kHz with a daytime and nighttime nominal and input power of 0.7 kW, and a daytime and nighttime common point current of 1.58 amperes, and a resistance of 281 ohms.

This authority expires on **February 1, 2023**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joe Szczesny", is written over a large, stylized blue loop.
