SECTION II - APPLICANT INFORMATION		
1. NAME OF APPLICANT Santa Barbara Broadcasting, Inc.		
MAILING ADDRESS 1317 Santa Barbara Street		
CITY Santa Barbara	STATE CA	ZIP CODE 93101

2. This application is for:

- ☐ Commercial
 ☐ Noncommercial
☐ AM Directional
 ☒ AM Non-Directional

Call letters KZSB	Community of License Santa Barbara, CA	Construction Permit File No. BP-202003223AAA	Modification of Construction Permit File No(s).	Expiration Date of Last Construction Permit June 19, 2023
----------------------	---	---	--	---

3. Is the station now operating pursuant to automatic program test authority in accordance with 47 C.F.R. Section 73.1620?

☒ Yes ☐ No

If No, explain in an Exhibit.

Exhibit No.

4. Have all the terms, conditions, and obligations set forth in the above described construction permit been fully met?

☒ Yes ☐ No

If No, state exceptions in an Exhibit.

Exhibit No.

5. Apart from the changes already reported, has any cause or circumstance arisen since the grant of the underlying construction permit which would result in any statement or representation contained in the construction permit application to be now incorrect?

☐ Yes ☒ No

If Yes, explain in an Exhibit.

Exhibit No.

6. Has the permittee filed its Ownership Report (FCC Form 323) or ownership certification in accordance with 47 C.F.R. Section 73.3615(b)?

☒ Yes ☐ No

☐ Does not apply

If No, explain in an Exhibit.

Exhibit No.

7. Has an adverse finding been made or an adverse final action been taken by any court or administrative body with respect to the applicant or parties to the application in a civil or criminal proceeding, brought under the provisions of any law relating to the following: any felony; mass media related antitrust or unfair competition; fraudulent statements to another governmental unit; or discrimination?

☐ Yes ☒ No

If the answer is Yes, attach as an Exhibit a full disclosure of the persons and matters involved, including an identification of the court or administrative body and the proceeding (by dates and file numbers), and the disposition of the litigation. Where the requisite information has been earlier disclosed in connection with another application or as required by 47 U.S.C. Section 1.65(c), the applicant need only provide: (i) an identification of that previous submission by reference to the file number in the case of an application, the call letters of the station regarding which the application or Section 1.65 information was filed, and the date of filing; and (ii) the disposition of the previously reported matter.

Exhibit No.

8. Does the applicant, or any party to the application, have a petition on file to migrate to the expanded band (1605-1705 kHz) or a permit or license either in the existing band or expanded band that is held in combination (pursuant to the 5 year holding period allowed) with the AM facility proposed to be modified herein?

☐ Yes ☒ No

If Yes, provide particulars as an Exhibit.

Exhibit No.

The APPLICANT hereby waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because use of the same, whether by license or otherwise, and requests and authorization in accordance with this application. (See Section 304 of the Communications Act of 1934, as amended).

The APPLICANT acknowledges that all the statements made in this application and attached exhibits are considered material representations and that all the exhibits are a material part hereof and are incorporated herein as set out in full in

CERTIFICATION

1. By checking Yes, the applicant certifies, that, in the case of an individual applicant, he or she is not subject to a denial of federal benefits that includes FCC benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. Section 862, or, in the case of a non-individual applicant (e.g., corporation, partnership or other unincorporated association), no party to the application is subject to a denial of federal benefits that includes FCC benefits pursuant to that section. For the definition of a "party" for these purposes, see 47 C.F.R. Section 1.2002(b).

☒ Yes ☐ No

2. I certify that the statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith.

Name Leslie R. Carroll	Signature <i>L.R. Carroll</i>

WILLFUL FALSE STATEMENTS ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE, TITLE 18, SECTION 1001), AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION

FCC NOTICE TO INDIVIDUALS REQUIRED BY THE PRIVACY ACT AND THE PAPERWORK REDUCTION ACT

The solicitation of personal information requested in this application is authorized by the Communications Act of 1934, as amended. The Commission will use the information provided in this form to determine whether grant of the application is in the public interest. In reaching that determination, or for law enforcement purposes, it may become necessary to refer personal information contained in this form to another government agency. In addition, all information provided in this form will be available for public inspection. If information requested on the form is not provided, the application may be returned without action having been taken upon it or its processing may be delayed while a request is made to provide the missing information. Your response is required to obtain the requested authorization.

Public reporting burden for this collection of information is estimated to average 639 hours and 53 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, can be sent to the Federal Communications Commission, Records Management Branch, Paperwork Reduction Project (3060-0627), Washington, D. C. 20554. Do NOT send completed forms to this address.

THE FOREGOING NOTICE IS REQUIRED BY THE PRIVACY ACT OF 1974, P.L. 93-579, DECEMBER 31, 1974, 5 U.S.C. 552a(e)(3), AND THE PAPERWORK REDUCTION ACT OF 1980, P.L. 96-511, DECEMBER 11, 1980, 44 U.S.C. 3507.

ENGINEERING STATEMENT

Radio Station KZSB, 1290 kHz, Santa Barbara, CA
Re: Construction Permit BP-20200323AAA

The Construction Permits BP-202003223AAA, BP-20190815AAW, and BP-20190906AAM, for stations KZSB, KOSJ, and KCLU respectively, authorize changes in the antenna system employed in common by these three stations, the community of license for all of which is Santa Barbara, CA.

The construction permit applications are essentially technically consistent specifying reduction in the electrical height and addition of a small amount of top-loading to the existing monopole antenna, which is slant wire fed. # Each of the application engineering reports clearly describes the slant wire feed system which has been in operation at this site for decades. However the KZSB construction permit contains two conditions which are inconsistent with the others. Condition 6 prohibit a slant wire feed, and condition 7 requires current distribution measurements, which are both unnecessary and inconclusive for such a small amount (5.6 degrees) of toploading, whose actual purpose is drive impedance improvement. Neither of the other two construction permits for use of this antenna facility have such conditions, and it is respectfully requested that they be removed from consideration in the KZSB license application. The construction is entirely consistent with the construction permit specifications and conditions 1 -5.

October 16, 2022

Benj. F. Dawson III, P.E.

* The applications for KOSJ and KZSB were prepared by the late Jeremy Ruck, P.E., and that for KCLU by L. Robert duTreil, Jr.

EQUIPMENT PROOF OF PERFORMANCE
Occupied Bandwidth, Harmonic and Spurious Signals

For

Radio Station KZSB 1290 kHz
Santa Barbara, California

Conducted on September 26, 2022

Measurements performed by Burt I. Weiner

Burt I. Weiner Associates
210 Allen Avenue
Glendale, California 91201
818-409-0185

www.biwa.cc

FOREWORD

This report contains the results of measurements as required under §73.1590, of the Rules and Regulations of the Federal Communications Commission. These requirements for these measurements are also shown in the AM Self-Inspection Checklist on page 18 under: Emissions, Section E. These measurements were conducted on September 26, 2022 on behalf of Radio Station KZSB Santa Barbara, California. KZSB operates on 1290 kHz with a day power of 500 Watts non-directional and a night power of 122 watts non-directional. KZSB is diplexed into a single monopole antenna along with radio stations KCLU on 1340 kHz and KOSJ on 1490 kHz. For these measurements the three stations involved in triplexed operation were each operating in the same mode at the same time in order to represent actual operating conditions.

The KZSB transmitter is a Harris model Gates-One preceded by an Orban model 9200 Digital audio processor that contains the necessary audio pre-emphasis and low pass filter circuitry to conform to NRSC-1 and NRSC-2.

These measurements show the extent to which KZSB complies with the occupied bandwidth and spurious and harmonic emission requirements of the Commission's rules, specifically, Section 73.44 regarding: AM Transmission Emission Limitations.

METHODS AND EQUIPMENT USED

The occupied bandwidth portions of the measurements were conducted using an Anritsu swept frequency Spectrum Analyzer model MS2721B. The antenna used is a DX-Engineering model PRO-1B Broadband Faraday Shielded Mobius Loop Antenna that was connected to the input of the Spectrum Analyzer with 10 feet of RG-223U coaxial cable.

For each of the attached spectrographs the analyzer was operated in the peak hold mode for numerous sweeps totaling a minimum of 10 minutes. These measurements conform to Section 73.44 (a) and (d) of the Commission's rules.

For the identification and measurements of harmonic and spurious signals in the 530 kHz to 5000 kHz range, a Potomac Instruments model FIM-41-1 Field Intensity Meter was used. A separate receiver tuned to 1290 kHz was used to aid in the identification of harmonics and the discovery of any spurious signals as noted in Tables A and B.

Measurements were made during daytime hours that occurred more than two hours after sunrise and concluded prior to two hours before sunset in order to minimize skywave interference.

LOCATION OF MEASUREMENTS

The measurements were made at a location .7 Kilometer from the KZSB transmitter on a bearing of 94.1°T as shown on the map marked as Exhibit A. This location is at 125 Quarantina Street in the parking lot opposite of the entrance to the building and immediately south of the planter.

RESULTS

The results of the occupied bandwidth portion of the measurements are the spectrographs shown in Figures 1 and 2 for Day Mode and Figure 3 and 4 for Night Mode. All spectrographs were made with the station operating under normal conditions and with program containing both speech and music.

Tables A and B show the results of measurements of both harmonic and any spurious emissions which were detected and determined to be associated with, but not necessarily attributable to the KZSB facilities at the time of measurement.

All emissions attributable to the KZSB broadcast facilities at the time of measurement were found to meet the requirements of Section 73.44(b) of the Commission's Rules and Regulations.

Qualifications of Engineer

Burt I. Weiner, whose office is located at 210 Allen Avenue, Glendale California, hereby states that he has been actively involved in broadcast engineering since 1957; that his qualifications as a technical consultant are a matter of record with the Federal Communications Commissions; that he has prepared this report for Radio Station KZSB, Santa Barbara, California; that he made the equipment performance measurements of Radio Station KZSB shown in this report; and that all of the data contained in this report is accurate and correct to the best of his knowledge and ability.

Burt I. Weiner

A handwritten signature in black ink, appearing to read "Burt I. Weiner". The signature is fluid and cursive, with the first name "Burt" being more prominent.
