Re: AMC Partners Escanaba, LLC (AMC)
WDMJ(AM), Marquette, MI
Facility Identification Number: 24448
Special Temporary Authorization (STA)
BESTA-20221121AAG

Dear Mr. Bernier:

This is in reference to the request filed on November 21, 2022. AMC requests a further extension of the STA granted on July 20, 2020, to continue operating with the new shorter tower recently installed at the licensed site to allow time to file the required FCC Form 301 application.¹ In support of the request, AMC stated that additional time will be needed to file the application with the AudioFilings team to request permanent use of the new tower.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, this supersedes the last authorization granted on August 12, 2022, and the request for the modified extension of the STA is hereby GRANTED. AMC may now commence operations from the licensed site using the newly constructed tower using reduced power day and night as requested (until the new 5 kW transmitter is installed), with a maximum of 5 kW day

¹ WDMJ(AM) is licensed for ND operation on 1320 kHz with 5 kW (day) and 0.135 kW (night).

and 0.135 kW at night, as previously licensed. AMC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 21, 2023**.

Sincerely,
