Re: Radio One Licenses, LLC
WFXC(FM), Durham, North Carolina
Facility Identification Number: 36952
Special Temporary Authority

Dear Ms. Harris:

This is in reference to the request filed November 24, 2008, on behalf of Radio One Licenses, LLC ("ROL"). ROL requests special temporary authority ("STA") to operate Station WFXC with temporary facilities.¹ In support of the request, ROL states that the licensed antenna is being replaced, and requests STA for operation with a temporary antenna mounted on the licensed tower. Our review indicates that no interference to any other station is likely to occur.

Accordingly, the request for STA IS HEREBY GRANTED. Station WFXC may operate with the following facilities:

Geographic coordinates:	35° 58' 41" N, 78° 48' 59" W (NAD 1927)
Channel	296 (107.1 MHz)
Effective radiated power:	2.5 kilowatts (H&V)
Antenna height:	
above ground:	128 meters
above mean sea level:	233 meters
Above average terrain:	130 meters

ROL must notify the Commission when licensed operation is restored. ROL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **March 2, 2009**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the

¹ WFXC is licensed for operation on Channel 296A (107.1 MHz) with effective radiated power of 2.6 kilowatts (H&V) and antenna height above average terrain of 153 meters.

Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
