

**Live Communications, Inc.**  
**Radio Station WTAL-AM @ Tallahassee, FL**  
**Statement in Support of STA Request**

This is a Request to extend Special Temporary Authority BSTA-20220706AAC, which was filed by email because the LMS filing system does not yet entertain such filings.

BSTA-20220706AAC permits WTAL-AM to operate from an alternate site location with a temporary long-wire antenna. Recently Construction Permit BP-20220407AAH was issued to WTAL-AM for new, modified permanent facilities. Substantial progress has been made towards building out Construction Permit BP-20220407AAH as noted in the attached email chain between FCC counsel, the applicant and its engineering consultant.

As engineer Chris Hall describes in his attached email dated December 23, 2022, the build out of Construction Permit BP-20220407AAH is expected to be completed during January 2023.

Based upon the foregoing, we submit that good cause exists for the grant of this STA Request so that WTAL-AM can continue to provide some level of broadcast service to Tallahassee, Florida and nearby areas.

Subject: **Re: STA expiring soon for WTAL-AM**

We have taken delivery of the new diplexer, currently we are awaiting third party contractors to complete the electrical service permits and construction and the building contractor to complete the permits and construction of the concrete pad for the new diplexer cabinets. We expect this to be completed in the month of January.

>

> The STA Extension Request needs to be supported by a Progress Report. I understand that some local permits are needed before you can build out the new Construction Permit. Please send me an email or a letter that briefly explains the steps you have already taken, and what still needs to be done, towards completing construction of the new, modified facilities.
