Re: **WNWR (Facility ID No. 1027; Philadelphia, PA) (the "License")**  
**Request for Extension of Engineering Special Temporary Authority**

Dear Ms. Dortch:

On behalf of Aztec Capital Partners, Inc. (the "Licensee"), the undersigned respectfully requests a further extension of special temporary authority to operate at variance from the License's licensed parameters for a period up to six months beyond the current expiration date of May 6, 2023. Below is a description of the reasons for such request which constitute good cause:

A further extension of the current STA is requested to provide sufficient time for full power operation to be restored, pursuant to the completion of the construction permit BP20220601AAG. Since the grant of the prior STA extension request, the licensee has made substantial progress towards restoring full power operation, completing the construction of the new transmitter building, installation of a new transmitter and working with the local utility company to complete the installation of the three-phase power lines to the new building. Additionally, the licensee resolved the previously mentioned diplex system issue. The Licensee requires additional time to complete the final steps of the construction. Finally, the Licensee filed an assignment application for the License on April 14, 2023; assuming that the assignment application is granted, the Licensee respectfully requests a further extension of STA to allow completion of the construction and, if needed, to provide the assignee sufficient time to begin operating the station and to resolve any remaining issues with the construction of the permitted facilities.

Please contact the undersigned should you have any questions regarding this request.

Best regards,

**Womble Bond Dickinson (US) LLP**
