May 2023 Update:

For the reasons described in the underlying STA (BSTA-20210208AAD) and the recent STA extension request (BESTA-20220502AAA), the licensee continues to operate WSML(AM) during daytime hours with licensed power of 10 kW and no nighttime operations. The WSML night antenna remains inoperable and un-repairable.

WSML(AM) still intends to relocate to the site authorized in the construction permit in FCC File No. BP-20211007AAH. The owner of the new site is continuing the process of preparing the facility for the proposed diplex installation but has run into some difficulties arranging the required electrical service.

The licensee respectfully requests extension of STA to operate during daytime hours at its current site until which time modifications at the proposed new site are completed. In the interim, extension of STA will allow the station to continue providing service to the public.
