Special Temporary Authority (STA)
BESTA-20230523AAC

Dear Ms. Torrado:

This is in reference to the request filed on May 23, 2023. JVC requests a further extension of the STA granted on January 30, 2018, to continue operating ND at night with reduced power to allow time to file the required FCC Form 302 application to update all operating parameters.¹ In support of the request, JVC stated that although progress has been made over the past six months, additional time is still needed to complete all remaining repairs.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

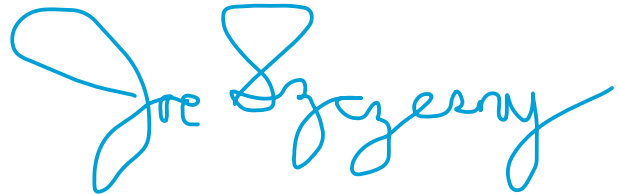

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and JVC may continue to operate ND at night with a maximum of 0.25 kW, with no change to the licensed daytime 5 kW operation. JVC must reduce the nighttime power level or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the

¹ WPRD(AM) is licensed for operation on 1440 kHz with 5 kW day (ND) and 1 kW night (DA).

Commission's exposure guidelines. *See* 47 CFR § 1.1310. JVC must submit an e-mail to my attention to note the date the application was filed.

This authority expires on **December 26, 2023.**²

Sincerely,
