Subject: KBEH-DT Channel 24

Dear Mohammad,

In regard to the KBEH-DT request for STA for very low power operation, please be advised that the applicant will employ a FULL-SERVICE digital television emission mask. For your purposes, this would have a better emission characteristic than a stringent mask. But if you need to specify simple or stringent, then STRINGENT should be specified. I note that the evaluation of this facility was based on a full-service interference analysis since a full-service station is proposed but with very low power.

If any further information is necessary, please do not hesitate to contact me.

Best wishes,

-Bob
