Re: KCKK(AM), Littleton, Colorado
Facility Identification Number: 52249
People's Wireless, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed April 9, 2009, on behalf of People's Wireless, Inc. ("PWI"). PWI requests special temporary authority ("STA") to operate Station KCKK¹ with operating parameters derived from a Method of Moments ("MOM") proof of performance, pending the completion of measurements necessary for filing with the MOM proof. In support of the request, PWI states that it is in the process of obtaining a license following completion of modifications to the station's facilities authorized by Construction Permit BP-20041019ACH, that it has elected to file a new MOM proof, that it has completed necessary measurements and that an amendment to its pending license application is being filed concurrently with the STA request.

Our review indicates that the proposed STA operation is not in compliance with the Commission's technical rules and our STA policies; however, if the operating power is reduced to currently licensed levels, it would comply. STA will be granted with a power reduction to 9.5 kW daytime and 19 kW nighttime. We note that pending Application BMP-20080714AAR proposes augmentation of the daytime and nighttime directional patterns; because new augmented patterns are not authorized by MOM proofs, it will be necessary to request dismissal of this application prior to grant of a license application supported by a MOM proof.

Accordingly, the request for STA IS HEREBY GRANTED. Station KCKK may operate with the substantially adjusted daytime and nighttime directional antenna patterns authorized by Construction Permit BP-20041019ACH (*See Note 1, below*) pending the filing and processing of

¹ KCKK is licensed for operation on 1510 kHz with 9.5 kilowatts daytime and 19 kilowatts nighttime, employing different directional antenna patterns during daytime and nighttime hours (DA-2-U). Construction Permit BP-20041019ACH authorizes increases in operating power to 10 kW daytime and 25 kW nighttime, and changes to the daytime and nighttime directional patterns. Application BMP-20080715AAR proposes the addition of augmentations to the daytime and nighttime patterns.

an amendment to License Application BL-20080717AQB, supported by a MOM proof of performance pursuant to 47 C.F.R. Section 73.151(c). Operating parameters shall be maintained as specified in the request². **Operating power shall not exceed 9.5 kW daytime and 19 kW nighttime.** It will be necessary to further reduce power or cease operation if complaints of interference are received. PWI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 13, 2009**.

Sincerely,

Charles N. Miller, Engineer
