Re: KOBBS-FM, Bozeman, Montana  
Facility Identification Number: 16776  
Reier Broadcasting Company, Inc  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed June 13, 2008, on behalf of Reier Broadcasting Company, Inc ("RBC"). RBC requests further extension of the special temporary authority ("STA") granted on May 22, 2003, for operation with temporary facilities.<sup>1</sup> In support of the request, RBC states that it has made progress toward resolving the litigation which has delayed construction of its modified facilities.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoration of licensed operation, but has been prevented from completing the work due to causes beyond its control. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KOBBS-FM

---

<sup>1</sup> KOBBS-FM is licensed for operation on Channel 229C1 (93.7 MHz) with effective radiated power ("ERP") of 100 kW (H&V) and antenna height above average terrain ("HAAT") of 78 meters. Application BPH-20090319AAS proposes relocation of the transmitter and operation with ERP of 51 kW (H&V) and HAAT of -39 meters.

may continue to operate with the following facilities:

Geographic coordinates:	45° 36' 58" N, 111° 05' 16" W (NAD 1927)
Channel	229 (93.7 MHz)
Effective radiated power:	7 kilowatts (H&V)
Antenna height:	
above ground:	69 meters
above mean sea level:	1646 meters
Above average terrain:	-37 meters

RBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 1, 2009**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.

Charles N. Miller, Engineer
