Subject: STA Request

Dear Mohammad,

Thanks for the head's up call this afternoon. Attached are exhibits which I thought were going to be attached to the STA application for digital operation of WBNF-CD, Channel 15 in Buffalo, New York (BSTA-20090511APM). As I mentioned on the phone, a stringent mask filter will be employed and the transmitter power output will be 400 watts (0.4 kW).

If you have any other questions, please don't hesitate to call me.

Kevin
