Re: KRDR(FM), Red River, New Mexico
Facility Identification Number: 82299
Red River Radio, Inc.
Special Temporary Authorization

Dear Mr. Nolen:

This is in reference to the request filed June 30, 2008, on behalf of Red River Radio, Inc. ("RRR"). RRR requests further extension of the special temporary authority ("STA") granted on December 1, 2006, to operate Station KRDR with temporary facilities.¹ In support of the request, RRR states that negotiations are in progress for restoration of the failed commercial power line to the station's transmitter site. RRR requests extension of STA for operation with temporary facilities in order to maintain service to the community.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KRDR may

¹ KRDR is licensed for operation on Channel 211C3 (90.1 MHz) with effective radiated power of 3.2 kilowatts (V only) and antenna height above average terrain of 219 meters.

continue to operate with the following facilities:

Geographic coordinates:	36° 40' 30" N, 105° 34' 47" W (NAD 1927)
Channel	211 (90.1 MHz)
Effective radiated power:	0.3 kilowatt (V only)
Antenna height:	
above ground:	10 meters
above mean sea level:	1999 meters
Above average terrain:	-64 meters

RRR must notify the Commission when licensed operation is restored. RRR must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 22, 2009**.

Sincerely,

Charles N. Miller, Engineer
