Re: DKKJW(FM), Stanton, Texas
Facility Identification Number: 76095
Unique Broadcasting, LLC
Special Temporary Authorization

Dear Mr. Wiggins:

This is in reference to the request filed August 5, 2008, on behalf of Unique Broadcasting, LLC ("UB"). UB requests extension of the special temporary authority ("STA") granted on February 5, 2008, to operate Station DKKJW with temporary facilities.¹ In support of the request, UB states that it has identified two possible new, permanent sites for the station, but that it has not yet executed a tower lease for either site, in part for financial reasons.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ DKKJW was formerly licensed for operation on Channel 290C2 (105.9 MHz) with effective radiated power of 32 kilowatts (H&V) and antenna height above average terrain of 134 meters. We note the station's license was cancelled and the call sign deleted by staff action on July 12, 2006; that UB was granted legal STA for operation with its formerly licensed facilities on March 30, 2007, and that the legal STA was to expire on September 26, 2007; however, a request for extension is pending.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station DKKJW may continue to operate with the following facilities:

Geographic coordinates:	32° 7' 42" N, 101° 48' 7" W (NAD 1927)
Channel	290 (105.9 MHz)
Effective radiated power:	0.1 kilowatt (H&V)
Antenna height:	
above ground:	19 meters
above mean sea level:	837 meters
Above average terrain:	26 meters

UB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 2, 2009**.

Sincerely,

Charles N. Miller, Engineer
