Subject: Response to WHDN-LD STA Query

Mr. Habib:

I am copying this e-mail to Lauren Lynch Flick and John Hane of Pillsbury Law as they are legal counsel for Gunter Marksteiner.

This is in response to your query regarding the Engineering STA (BSTA-20090528AMJ) which was filed on behalf of Guenter Marksteiner for WHDN-LD. The requested text is below:

The proposed WHDN-LD antenna will be mounted above the rooftop of an existing building. The use of existing transmitting locations has been characterized as being environmentally preferable by the Commission, according to Note 1 of §1.1306 of the FCC Rules. Since the antenna structure will extend only 4.6 meters above the top of the rooftop, notification to the FAA is not required and no change in structure marking and lighting requirements is anticipated. Therefore, it is believed that this application may be categorically excluded from environmental processing pursuant to §1.1306 of the Commission's rules.

The full engineering text and exhibits for the proposed facility are associated with file number BDISDTL-20090313AAF and includes discussion on allocation and environmental issues. Please let me know if you have any additional questions.

Sincerely,
Bob Clinton
