Re: KMAJ-FM, Topeka, Kansas
Facility Identification Number: 42012
Kansas City Trust, LLC
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed September 24, 2008, for further extension of the special temporary authority (STA) originally granted on January 31, 2001, to operate Station KMAJ-FM with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, Cumulus states that it is working to resolve the issues which have prevented it from constructing modified facilities authorized by Construction Permit BPH-20080514AGH and, if necessary, to file a further modification application.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is

¹ Station KMAJ-FM is licensed to Topeka, Kansas, for operation on Channel 299C (107.7 MHz) with effective radiated power ("ERP") of 100 kilowatts (H&V), and antenna height above average terrain ("HAAT") of 370 meters. Construction Permit BPH-20081124ALA authorizes a change in the community of license to Carbondale, relocation of the transmitter, a downgrade to Class C1 and operation with ERP of 53 kilowatts and HAAT of 235 meters.

warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KMAJ-FM may continue to operate with the following facilities:

Geographic coordinates:	38° 57' 15" NL, 95° 54' 43" WL (NAD 1927)
Channel	299 (107.7 MHz)
Effective radiated power:	15 kilowatts (H&V)
Antenna height:	
above ground:	183 meters
above mean sea level:	551 meters
above average terrain:	229 meters
ASRN ²	1033285

The licensee must notify the Commission when licensed operation is restored. The licensee must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 10, 2009**.

Sincerely,

Charles N. Miller, Engineer
