Subject: STA Request BLSTA-20090617AAO, Polar Broadcasting, Inc. KFTL-CA

Please add the following statement to this STA application.

"Part 73 Output Mask": The applicant requests that the FCC Part 73 Full Service output channel mask be used in determining the interference to the two adjacent channels.

This STA request matches application BDFCDTA-20090603AGJ which contains the above provision in the Engineering Statement. However, when the STA application was prepared this specific provision was inadvertently omitted.
