Re: Genesis Communications of Tampa Bay, Inc. ("Genesis")
WWBA (AM), Largo, Florida
Facility Identification Number: 51971
Special Temporary Authority

Dear Mr. Maduri:

This is in reference to the request filed December 8, 2008, by counsel on behalf of former licensee Mega Communications of St. Petersburg Licensee, LLC ("MCSP"). MCSP requested extension of the special temporary authority ("STA") originally granted on November 30, 2006, and modified on June 9, 2008.¹ In support of the request, MCSP stated that the construction cranes continue operation in the near vicinity of the 287.5° daytime monitor point.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WWBA may continue to operate during daytime hours with the 287.5° monitor point in excess of the licensed limit. All other monitor points must remain below licensed limits, and all antenna monitor indications must remain within licensed tolerances. The 287.5° monitor point may not exceed 70 mV/m; it will be necessary to reduce operating power if this should occur. It will be necessary to

¹ WWBA is licensed for operation on 820 kHz with 50 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

reduce power or cease operation if complaints of interference are received. Genesis must notify the Commission when licensed operation is restored.² Genesis must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 30, 2009**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a stylized flourish at the end.

Charles N. Miller, Engineer
