In re: W230AR, New Castle, IN
BPFT-20090806ACS
Facility ID # 142835

Dear Applicant:

This refers to: (1) the above-captioned application for W230AR, New Castle, Indiana.

An engineering study has revealed the application is a major change application pursuant to 47 C.F.R. § 74.1233(a)(1). Specifically, the Section states that "a major change is... any change in antenna location where the station would not continue to provide 1 mV/m service to some portion of its previously authorized 1 mV/m service area." The proposed service area would not continue to provide service to some portion BLFT-20051219AAI service area. Because major change applications are not being accepted for filing, we dismiss the application.

Secondly, the engineering study has revealed the application violates 47 C.F.R. § 74.1235 (b)(1) since the application proposes a maximum effective radiated power ("ERP") of 250 watts. Section 74.1235(b)(1) states that the maximum allowable effective radiated power with an antenna height above average terrain (HAAT) between 33 and 39 meters is 170 watts. Our study reveals that the azimuth at 0° has a HAAT of 36 meters and an ERP of 250 watts. The application failed to discuss this violation. Therefore, we will dismiss the application.

In light of the above, the application BPFT-20090806ACS filed by Indiana Community Radio Corporation unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
Audio Division

No topographic data is available for this location.

A1 - Number of radials where free space equation was used for field strength calculations.

A7 - Number of radials where a HAAT less than 30 meters was adjusted to 30 meters.
