Re: KQMC(FM), Hawthorne, Nevada
Facility Identification Number: 79036
American Educational Broadcasting, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed January 19, 2007, on behalf of American Educational Broadcasting, Inc. ("AEB"). AEB requests special temporary authority ("STA") to operate Station KQMC with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, AEB states that adverse weather conditions at the licensed transmitter site are causing intermittent outages, and also are preventing station personnel from accessing the site.

Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(2) provides that FM and TV stations may erect any suitable radiator, or use operable sections of the authorized antenna(s) as an emergency antenna.

Accordingly, the request for STA IS HEREBY GRANTED. Station KQMC may operate with the following facilities:

Geographic coordinates:	38° 31' 26" N, 118° 37' 21" W (NAD 1927)
Channel	211 (90.1 MHz)
Effective radiated power:	0.23 kilowatt (V only)
Antenna height:	
above ground:	11 meters
above mean sea level:	1331 meters
Above average terrain:	-262 meters

AEB must notify the Commission when licensed operation is restored. AEB must use whatever

¹ KQMC is licensed for operation on Channel 211C2 (90.1 MHz) with effective radiated power of 0.48 kilowatt (V only) and antenna height above average terrain of 957 meters.

cc: American Educational Broadcasting, Inc.

Audio Division
Charles N. Miller, Engineer

Sincerely,

- Expedited restoration of licensed facilities beyond the licensee's control, and the licensee has taken all possible steps to resolve the problem.
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to resolve the problem.
- Substantial progress has been made during the most recent STA period toward restoration of licensed facilities, or
- Restoration of licensed facilities is complete and testing is underway;

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

Accordingly, Special Temporary Authority Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service. Stations operating with less than licensed operation more convenient for the broadcaster. Stations operating his facility or make of an application, nor is it a means by which a broadcaster may enhance his facility or make a licensee/petty may circumvent established procedures which require the filing would seriously prejudice the public interest." However, Section 309(f) is not a means by which authorizations in the public interest and when delay in the institution of the temporary operations Commission to grant STA in cases of "extraordinary circumstances requiring temporary STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the

This authority expires on July 23, 2007.

means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.
