**Re: Notification of Return to Licensed Parameters
KUTY(AM), Palmdale, California (FIN-22011)**

Dear Ms Dortch:

On behalf of High Desert Broadcasting LLC ("High Desert"), licensee of KUTY(AM), Palmdale, California, this letter is to notify the Commission that KUTY(AM) has returned to normal operations consistent with its licensed parameters.

Previously, High Desert notified the FCC that because of an equipment failure it had to operate at variance with its licensed parameters using a lower-power back-up transmitter. By STA granted on January 6, 2009 (BSTA-20081223ACN) and extended on August 13, 2009 (BESTA-20090706AGP), the Commission granted authority for KUTY(AM) to operate at variance while High Desert tried to find replacement parts for the station's main transmitter. Replacement parts have since been obtained and installed, and the main transmitter is once again operating at 5 kW of power on both the daytime and nighttime patterns. The daytime and nighttime monitoring points are also within their required limits. As High Desert has now completed the necessary repairs and restored the station's operations consistent with its licensed parameters, the authorized STA is no longer necessary and is hereby surrendered.

If there should be any questions regarding this matter, please contact the undersigned.

Sincerely,

Brendan Holland
