Subject: RE: K59CI (Globe/Miami, Arizona) (FCC File No. BSTA-20091020ABB)

Mr. Habib,

Thanks for your telephone call this morning making sure that this STA request is complete. The out-of-channel emission mask on these facilities is SIMPLE.

To the extent questions arise, please don't hesitate to contact me.

Thanks,
Scott Patrick

If the STA request also requires coordination with Mexico , we will not be able to grant it unless we get the IB's blessing. If it does require the Mexican coordination, you might want to discuss it with IB.

Subject: K59CI (Globe/Miami, Arizona) (FCC File No. BSTA-20091020ABB)

Mr. Hashemzadeh,

I just wanted to bring the above referenced STA request to your attention and provide an explanation. K59CI filed a displacement application for operation on in-core Channel 27 (FCC File No. BDISDTT-20090824ACI). Verizon, however, is preparing for 700 MHz operations that would cause actual displacement of the current Channel 59 operations. K59CI understands that the pending displacement application must undergo Mexican review, so it accordingly has filed the above-referenced STA request to permit operation on Channel 27 until such time as the Commission can complete processing of the displacement application.

If you all have any questions or need additional information, please feel free to contact me.

Best regards,
Scott Patrick
