Re: KTOT (FM), Spearman, Texas
Facility Identification Number: 92623
Kanza Society, Inc.
Special Temporary Authority

Dear Mr. Springer:

This is in reference to the request filed October 29, 2009, on behalf of Kanza Society, Inc. ("KSI"). KSI requests extension of the special temporary authority ("STA") granted on May 18, 2009, to operate Station KTOT¹ with emergency antenna facilities pursuant to Section 73.1680. In support of the request, KSI states that it has determined that its antenna system must be replaced, and that it continues to work with its insurance carrier and tower crews to complete the repair work. KSI states that it expects to complete repairs by the end of January, 2010, weather permitting.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KTOT may continue to operate with the following facilities:

¹ KTOT is licensed for operation on Channel 208C0 (89.5 MHz) with effective radiated power of 100 kW (H&V) and antenna height above average terrain of 325 meters.

Geographic coordinates:	36° 03' 44" N, 101° 01' 56" W (NAD 1927)
Channel	228 (93.5 MHz)
Effective radiated power:	49 kilowatts (H&V)
Antenna height:	
above ground:	252 meters
above mean sea level:	1193 meters
Above average terrain:	292 meters

KSI must notify the Commission when licensed operation is restored. KSI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **April 30, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
