Re: WGDJ(AM), Rensselaer, NY  
Facility Identification Number: 40768  
BMML-20091030AID  
Construction permit: BP-200800305ADS  
Program Test Authority

Dear Counsel:

This is in reference to the amendment submitted today to WGDJ's pending license application to cover the above-captioned construction permit.

The amendment submitted additional information in response to our letter of November 13, 2009, granting program test authority with daytime power limited to a nominal 5 kilowatts. Program test authority is therefore revised to permit operation at full power for both day and nighttime hours, in accordance with Section 73.1620 of the Commission's Rules and the permit, BP-20080305ADS. WGDJ shall operate on 1300 kHz with a nominal daytime power of 10 kilowatts, and a nominal nighttime power of 8 kilowatts. Program tests are authorized with a daytime antenna input power of 10.5 kilowatts (common point current 14.5 amperes), and with a nighttime antenna input power of 8.4 kilowatts (common point current 13.0 amperes). The antenna monitor parameters shall be as shown in the pending license application, as amended.

Program test authority will remain valid while the license application is pending, in accordance with Section 73.1620 of the Commission's Rules.

Sincerely,

Ann Gallagher
