Re: WLAN(AM), Lancaster, Pennsylvania
Facility Identification Number: 52260
Clear Channel Broadcasting Licenses, Inc.
Special Temporary Authorization

Dear Mr. Langham:

This is in reference the request filed January 4, 2010, on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"), license of Station WLAN(AM), Lancaster Pennsylvania.¹ CCBL requests further extension of the special temporary authority ("STA") granted on July 13, 2007, for operation of Station WLAN with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. CCBL states that, while it was continuing repair of its damaged array, it was notified by the site owner that it must vacate the property. CCBL requests extension of STA while it seeks a new site for the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that it would not be practical for CCBL to restore a directional antenna system which it must soon abandon; thus, the licensee has been prevented from restoring licensed operation due to causes beyond its control. Thus, extension of STA is warranted.

¹ WLAN is licensed for operation on 1390 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WLAN may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCBL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 7, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.
