Re: KCAL (AM), Redlands, California  
Facility Identification Number: 55416  
Lazer Licenses, LLC  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed January 14, 2010, on behalf of Lazer Licenses, LLC ("LLL"). LLL requests further extension of the special temporary authority ("STA") granted on June 21, 2006, to operate Station KCAL with reduced power.<sup>1</sup> In support of the request, LLL states that it has completed some repair work but that several items remain to be done. LLL states that it has filed an application to relocate the transmitter and combine the daytime and nighttime sites, which would result in significant cost savings if implemented.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the Application BP-20090909AAF is pending before the Commission; thus, the licensee has made substantial progress toward restoration of licensed operation and extension of STA is warranted.

---

<sup>1</sup> KCAL is licensed for operation on 1410 kHz with 5 kilowatts daytime and 4 kilowatts nighttime, employing separate daytime and nighttime transmitter sites and employing a directional antenna during nighttime hours only (DA-N-U). Application BP-20090909AAF proposes relocating the daytime and nighttime transmitters to a common site and operation with 4.7 kilowatts daytime and 4 kilowatts nighttime, employing different directional patterns day and night (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KCAL may continue to operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. LLL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 2, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.
