In re: Low Power Television Application of:  
William Morgan  
Channel 34, Calhoun City, MS.  
File no: BMPDTL-20100315ACW  
Facility Id No.:72540

Dear Applicant:

We are currently processing your above-referenced application. Our preliminary engineering review reveals that your proposed facility does not comply with the Commission's interference rules. Specifically, the proposal is predicted to cause interference to the following facilities:

1. WCBI-TV, Columbus, MS. – BLCDT-20020822ABO

In addition to the above interference problem, our review reveals a discrepancy with the towers overall height above ground level. The overall height above ground level indicated in your proposed construction permit is 98 meters.

Based on the ASRN number of 1062833 as provided in the construction permit, the registration search results shows the following:

Specified Search							
Registration Number like <b>1062833</b>							
	Registration Number	Status	File Number	Owner Name	Latitude/Longitude	Structure City/State	Overall Height Above Ground (AGL)
1	1062833	Constructed	A0073409	BRUCE INDEPENDENT TV INC	34-01-17.0N 089-21-17.0W	BRUCE, MS	97.5

The difference in the two overall heights above ground level indicates a proposed tower height increase of 0.5 meters, which will require re-registration with the FAA.

You are hereby given the opportunity to file a minor amendment to resolve the specified interference problem and the tower height issue within (30) days from the date of this letter. Amendments must be filed electronically. If not so amended, your application will be considered incomplete and subsequently dismissed.

Sincerely

Hossein Hashemzadeh  
Associate Chief  
Video Division  
Media Bureau
