Re: Jackson Hole Community Radio, Inc.  
KHOL(FM), Jackson, Wyoming  
Facility Identification Number: 92620  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed March 3, 2010, on behalf of Jackson Hole Community Radio, Inc. ("JHCR"). JHCR requests further modification and extension of the special temporary authority ("STA") granted on March 26, 2008, and modified on August 27, 2008, to operate Station KHOL with temporary facilities.<sup>1</sup> In support of the request, JHCR states that severe winter weather conditions at the transmitter site have continued to delay installation of the STL link, which prevents operation with the licensed main and auxiliary facilities. JHCR requests further modification of STA to return to the temporary antenna mounted on the studio building.<sup>2</sup>

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

---

<sup>1</sup> KHOL is licensed for operation on Channel 206C3 (89.1 MHz) with effective radiated power ("ERP") of 2.2 kW (H&V) and antenna height above average terrain ("HAAT") of 336 meters.

<sup>2</sup> We note that the STA facilities in the most recent extension were the same as had been proposed in Application BPED-20080807ABU; however, that application was dismissed by the staff on March 12, 2010, following grant of Construction Permit BMPED-20071022AVX, for new FM Station KYSK at Ririe, Idaho. Continued use of those STA facilities would result in predicted impermissible contour overlap with Station KYSK.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted. Our review further indicates that the proposed STA facilities are the same as were previously authorized.

Accordingly, the request for extension and modification of STA IS HEREBY GRANTED. Station KHOL may operate with the following facilities:

Geographic coordinates:	43° 28' 55" N, 110° 45' 52" W (NAD 1927)
Channel	206 (89.1 MHz)
Effective radiated power:	0.1 kilowatt (V only)
Antenna height:	
above ground:	15 meters
above mean sea level:	1909 meters
Above average terrain:	-263 meters

JHCR must notify the Commission when licensed operation is restored. JHCR must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 6, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
