Re: CCR-St. George IV, LLC
KUNF (AM), Washington, Utah
Facility Identification Number: 55398
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed March 11, 2010, on behalf of CCR-St. George IV, LLC ("CCR"). CCR requests further extension of the special temporary authority ("STA") granted on September 23, 2009, to operate Station KUNF with reduced power.¹ In support of the request, CCR states that the station staff has concluded that the existing transmitter cannot be repaired and must be replaced.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KUNF may continue to operate with reduced power. It will be necessary to further reduce power or cease

¹ KUNF is licensed for operation on 1210 kHz with 10 kilowatts daytime and 0.25 kilowatt nighttime, employing a nondirectional antenna (ND-2-U).

operation if complaints of interference are received. CCR must notify the Commission when licensed operation is restored.² CCR must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 13, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
