In re: K262BP, Conner, CA
BPFT-20100310ACP
Facility ID # 144609

Dear Applicant:

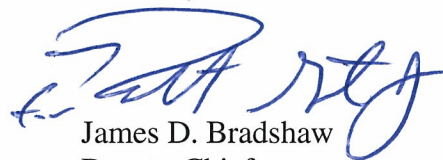

This refers to: (1) the above-captioned application for K262BP, Conner, California.

An engineering study has revealed the application violates 47 C.F.R. § 74.1204(a) with respect to KMQA(FM), East Port, CA (BLH-20080103ABT). Section 74.1204(a) states that an application for a FM translator station will not be accepted if the proposed operation would involve prohibited overlap of predicted field strength contours with any other authorized station. The proposed 48 dBu interference contour overlaps with the 54 dBu protected contour of KMQA(FM).

In addition, the application proposes an effective radiated power ("ERP") of 100 watts (Vertical) and 38 watts (Horizontal). Section 74.1235(b)(1) states that the maximum allowable effective radiated power with an antenna height above average terrain (HAAT) between 48 and 57 meters is 80 watts. Our study reveals that the azimuth at 270° has a HAAT of 53 meters. The application failed to discuss this violation. Therefore, we will dismiss the application.

In light of the above, the application BPFT-20100310ACP filed by Juan Alberto Ayala is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
