Re: Cansta

Capstar TX Limited Partnership WERC (AM), Birmingham, Alabama Facility Identification Number: 2112 Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed May 21, 2010, on behalf of Capstar TX Limited Partnership ("Capstar"). Capstar requests extension of the special temporary authority ("STA") granted on May 28, 2009, to operate Station WERC with parameters at variance and/or reduced power while maintaining monitor points within licensed limits, and with a nondirectional antenna and reduced power. In support of the request, Capstar states that replacement phasing and sampling equipment is being installed.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WERC may

¹ WERC is licensed for operation on 960 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation during nighttime hours with a temporary nondirectional antenna and reduced power not to exceed 1.25 kilowatts also is authorized, only as necessary to facilitate the repair work. It will be necessary to further reduce power or cease operation if complaints of interference are received. Capstar must notify the Commission when licensed operation is restored.² Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 17, 2010**.

Sincerely,

Charles N. Miller, Engineer

Audio Division Media Bureau
