Re: WDDM (FM), Hazlet, New Jersey
Facility Identification Number: 70644
WVRM, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed June 4, 2010, on behalf of WVRM, Inc. ("WI"). WI requests further extension of the special temporary authority ("STA") granted on August 2, 2007, to operate Station WDDM at variance from its authorization.¹ In support of the request, WI states that its Application BPED-20071109ADP remains pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted. Our review further indicates that Construction Permit BNPED-20071022BVB, for new, noncommercial, educational FM station WSFS, on Channel 207A at Freehold, New Jersey, was granted on June 4, 2009, and a modification of the permit was granted in File No. BMPED-20100318AKW on April 14, 2010. The STA will be

¹ WDDM is licensed for operation on Channel 207D with effective radiated power ("ERP") of 0.01 kW (H&V) and antenna height above average terrain ("HAAT") of 38 meters. Application BPED-20071109ADP proposes a change in frequency to Channel 284D (104.7 MHz), relocation of the transmitter, a reduction in ERP to 0.005 kW and an increase in HAAT to 139 meters.

conditioned appropriately.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WDDM may continue to operate with the following facilities:

Geographic coordinates:	40° 23' 45" N, 74° 10' 30" W (NAD 1927)
Channel	207 (89.3 MHz)
Effective radiated power:	0.0035 kilowatt (H&V)
Antenna height:	
above ground:	67 meters
above mean sea level:	158 meters
Above average terrain:	134 meters

WI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. **Operation pursuant to this authority shall terminate and this authority will cancel automatically upon commencement of operation by new noncommercial, educational FM station WSFS on channel 207A at Freehold, New Jersey, File No. BMPED-20100318AKW.**

Unless terminated earlier as discussed above, this authority expires on **December 23, 2010**.

Sincerely,

Charles N. Miller, Engineer
